SUMMARY

Experienced Full Stack Software Engineer specializing in building scalable web applications and SaaS products that solve real business problems. Skilled in designing end-to-end software solutions using TypeScript, React, Next.js, Node.js, and Python, with experience spanning frontend development, backend APIs, database design, payment integrations, cloud deployment, and modern development workflows. Passionate about shipping reliable, user-focused products from concept to production.

EDUCATION

Bachelor of Science in Computer Science

EXPERIENCE

Freelance Software Engineer

Jan 2024 – Present

Remote

- Designed and developed production-ready web applications and SaaS products using React, Next.js and TypeScript.
- Built scalable backend APIs and integrated third-party services, including secure payment gateways and external APIs.
- Architected responsive, SEO-optimized applications with a focus on performance, accessibility and maintainability.
- Collaborated directly with clients to translate business requirements into technical solutions and oversee projects from planning through deployment.
- Managed source control using Git and GitHub while following modern development workflows.

Software Engineer Trainee

Feb 2024 – Feb 2025

ALX Software Engineering

Remote

- Developed full-stack applications using Python, Flask and SQLAlchemy, implementing backend logic and database integration.
- Configured and maintained Ubuntu servers to improve reliability and deployment consistency.
- Implemented HAProxy load balancing to distribute application traffic efficiently.
- Utilized Datadog to monitor application and infrastructure performance, enabling proactive issue resolution.
- Automated server configuration and maintenance using Puppet.
- Collaborated in Agile teams using GitHub for version control, code reviews and continuous integration.

Web Developer

Mar 2023 – Nov 2023

TheDevBuild

Remote

- Developed responsive client websites using HTML, CSS and JavaScript.
- Built reusable user interface components and contributed to a company-wide design system.
- Improved website accessibility, mobile responsiveness and search engine optimization.
- Worked closely with designers and developers to deliver high-quality web experiences.

Web Developer

Aug 2021 – Mar 2022

Motito

Remote

- Developed modern, responsive web applications using JavaScript, HTML and CSS.
- Improved application performance by approximately 45% through frontend optimization techniques.
- Built internal dashboards using JavaScript, SQL, BigQuery and Retool to visualize business data.

- Worked directly with clients to gather requirements and deliver technical solutions aligned with business objectives.
- Supported Agile development processes, including serving as Scrum Master during project delivery.

PROJECTS

SIKAKORAA | A SaaS platform that enables service-based businesses to manage bookings and accept online payments through a secure, non-custodial payment workflow.

- Technologies: Next.js, TypeScript, PostgreSQL, Paystack
- Designed the booking and payment workflow for service providers.
- Integrated secure online payments without processing or holding customer funds.
- Built provider dashboards, booking management and scheduling functionality.

Kunanyesha | A weather intelligence platform that provides localized forecasts to support operational planning and decision-making.

- Technologies: Next.js, Python, Weather APIs
- Built responsive dashboards for weather visualization.
- Integrated external weather services to deliver localized forecasts.
- Focused on performance, usability and reliable data presentation.

TECHNICAL SKILLS

Programming Languages: TypeScript • JavaScript • Python • SQL • C

Frontend: React • Next.js • HTML5 • CSS3 • Tailwind CSS • SCSS • jQuery • Angular

Backend: Node.js • Flask • REST APIs

Databases: SQLAlchemy • Firebase

Tools & Platforms: Git • GitHub • Docker • Linux • HAProxy • Datadog • Vercel • Webflow • WordPress • Retool • Figma • Webpack

Development Practices: Responsive Design • Performance Optimization • API Integration • Agile • Version Control • System Design

INTERESTS

Reading • Cooking • Football
