EXPERIENCE

Freelance, Remote — Software Engineer

Jan 2024 - PRESENT

- Designed and developed responsive web applications using React.js and Next.js, leveraging server-side rendering and static site generation for improved performance and SEO.
- Implemented complex UI components with Tailwind CSS, ensuring consistent design and mobile-first responsiveness across devices.
- Built dynamic client websites on CMS platforms like Webflow and WordPress, customising themes and integrating third-party APIs to meet client-specific requirements.
- Utilised Git and GitHub for version control, managing branches, pull requests, and code reviews to maintain code integrity and collaborate effectively with clients.

ALX-S.E Trainee, Remote — Software Engineer

Feb 2024 - Feb 2025

- Configured and maintained Ubuntu web servers to optimise performance and ensure high reliability.
- Implemented HAProxy load balancer to distribute incoming traffic efficiently, preventing server overload and improving uptime.
- Utilised Datadog for real-time monitoring and analysis of server metrics, enabling proactive issue detection and resolution.
- Automated server configuration and routine maintenance tasks using Puppet, reducing manual effort and deployment errors.
- Developed a full-stack Airbnb clone using Python, Flask, jQuery, and SQLAlchemy, focusing on back-end logic and database integration.
- Collaborated closely with a team using GitHub for version control, code reviews, and continuous integration, enhancing code quality and teamwork.

TheDevBuild, Remote — Web Developer

Mar 2023 - Nov 2023

- Built and maintained client websites using HTML, CSS, and JavaScript
- Implemented responsive designs that work across all device sizes
- Collaborated in the creation and implementation of a comprehensive company-wide design system, enhancing consistency and efficiency across all teams.
- Ensured cross-browser compatibility, mobile responsiveness, and SEO best practices in our websites.

Motito, Remote — Web Developer

Mar 2023 - Nov 2023

- Designed and developed modern, responsive web applications using JavaScript, HTML/CSS, focusing on accessibility, and clean UI/UX.
- Optimised the company web application performance, improving load times by 45%
- Facilitated Agile workflows and served as Scrum Master to streamline project delivery
- Built an internal dashboard using JavaScript and SQL, integrating BigQuery data with Retool to visualise and manage user demographics.
- Ensured cross-browser compatibility, mobile responsiveness, and SEO best practice
- Worked closely with clients to gather requirements, offer technical guidance, and deliver tailored digital solutions that align with business goals.
